

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE
JOURNAL OF INFECTIOUS DISEASES

The
Journal of Infectious Diseases

Published by the Memorial Institute for Infectious Diseases

EDITED BY
LUDVIG HEKTOEN AND EDWIN O. JORDAN

IN CONJUNCTION WITH
FRANK BILLINGS F. G. NOVY
W. T. SEDGWICK H. GIDEON WELLS

Volume 18
1916

Chicago, 1916

Composed and Printed by
American Medical Association Press
Chicago, Illinois U. S. A.

TABLE OF CONTENTS

NO. 1, JANUARY, 1916

	PAGE
The use of brilliant green for the isolation of typhoid and paratyphoid bacilli from feces <i>Charles Krumwiede, Jr., Josephine S. Pratt, and Helen I. McWilliams</i>	1
The mechanism of the Abderhalden reaction with bacterial substrates <i>G. H. Smith and M. W. Cook</i> - - - - -	14
Studies in nonspecific complement-fixation. I. Nonspecific complement-fixation by normal rabbit serum <i>John A. Kolmer and Mary E. Trist</i> - - - - -	20
Studies in nonspecific complement-fixation. II. Nonspecific complement-fixation by normal dog serum <i>John A. Kolmer, Mary E. Trist, and George D. Heist</i> - - -	27
Studies in nonspecific complement-fixation. III. The influence of splenectomy and anesthetics on the nonspecific complement-fixation sometimes shown by normal rabbit and dog sera <i>John A. Kolmer and Richard M. Pearce</i> - - - - -	32
Studies in nonspecific complement-fixation. IV. The relation of serum lipoids and proteins to nonspecific complement-fixation with normal rabbit and dog sera <i>John A. Kolmer</i> - - - - -	46
Studies in nonspecific complement-fixation. V. The effect of heat on normal rabbit and dog sera in relation to antilytic and nonspecific complement-fixation reactions <i>John A. Kolmer and Mary E. Trist</i> - - - - -	64
Complement-fixation in intestinal parasitism of dogs <i>John A. Kolmer, Mary E. Trist, and George D. Heist</i> - - -	88
Epidemiology and symptomatology of an outbreak of septic sore throat in Westchester county, New York <i>C.-E. A. Winslow and L. W. Hubbard</i> - - - - -	106
The value of virulent salt solution in the production of antihog-cholera serum by the intravenous method <i>Robert Graham and L. R. Himmelberger</i> - - - - -	118
A filterable organism isolated from the tissues of cholera hogs (Plate 1) <i>Daniel J. Healy and Edwin J. Gott</i> - - - - -	124

NO. 2, FEBRUARY, 1916

The mode of infection in pulmonary distomiasis. Certain fresh-water crabs as intermediate hosts of <i>Paragonimus westermanii</i> (Plates 2 to 5) <i>Koan Nakagawa</i> - - - - -	131
A milk-borne paratyphoid outbreak in Ames, Iowa <i>Max Levine and Frederick Eberson</i> - - - - -	143
The variations in reaction of the blood of different species as indicated by hemolysis of the red blood cells when treated with acids or alkalis <i>James Gordon Cumming</i> - - - - -	151
The physical chemistry of disinfection, I <i>John F. Norton and Paul H. Hsu</i> - - - - -	180

	PAGE
The diphtheroid bacillus of Preisz-Nocard from equine, bovine, and ovine abscesses. Ulcerative lymphangitis and caseous lymphadenitis <i>Ivan C. Hall and Raymond V. Stone</i> - - - - -	195
Further investigation into the precipitation of the typhoid bacillus by means of definite hydrogen-ion concentration <i>Constantine F. Kemper</i> - - - - -	209
A leptothrix associated with chronic hemorrhagic nephritis <i>G. R. Dick, G. F. Dick, and B. Rappaport</i> - - - - -	216
Observations upon the endamebae of the mouth. I. <i>Endamoeba gingivalis</i> (buccalis) (Plate 6) <i>Charles F. Craig</i> - - - - -	220

NO. 3, MARCH, 1916

The examination of the urine and feces of suspect typhoid-carriers, with a report on elaterin catharsis <i>F. O. Tonney, F. C. Caldwell, and P. J. Griffin</i> - - - - -	239
The bactericidal and protozoacidal activity of emetin hydrochlorid in vitro <i>John A. Kolmer and Allen J. Smith</i> - - - - -	247
The bactericidal and protozoacidal action of emetin hydrochlorid in vivo <i>John A. Kolmer and Allen J. Smith</i> - - - - -	266
The natural resistance of the pigeon to the pneumococcus (Plate 7) <i>Preston Kyes</i> - - - - -	277
The sanitary control of swimming pools <i>Max Levine</i> - - - - -	293
Experimental cholera-carriers <i>Otto Schöbl</i> - - - - -	307
The localization of streptococci in the eye. A study of experimental iridocyclitis in rabbits <i>Ernest E. Irons, E. V. L. Brown, and W. H. Nadler</i> - - - - -	315

NO. 4, APRIL, 1916

The tuberculocidal action of arsenic compounds and their distribution in the tuberculous organism. Studies on the biochemistry and chemotherapy of tuberculosis, XIV <i>Aaron Arkin and H. J. Corper</i> - - - - -	335
A case of infection of lymph glands with <i>Bacillus paratyphosus</i> B <i>Clarence L. Cole</i> - - - - -	349
Simultaneous injections of streptococci and dahlia in the guinea-pig <i>W. H. Hoffman, W. B. McClure, and L. W. Sauer</i> - - - - -	353
The correlation of the Voges-Proskauer and methyl-red reactions in the colon-aerogenes group of bacteria <i>Max Levine</i> - - - - -	358
The bactericidal and fungicidal action of copper salts. Studies on the biochemistry and chemotherapy of tuberculosis, XV <i>Lydia M. DeWitt and Hope Sherman</i> - - - - -	368
An epidemic of appendicitis and parotitis probably due to streptococci contained in dairy products <i>Edward C. Rosenow and Stella I. Dunlap</i> - - - - -	383
The production and collection of <i>B. Coli</i> in quantity on synthetic media <i>Robert Bengis</i> - - - - -	391

TABLE OF CONTENTS

vii

	PAGE
The production of a hyperimmune serum for infectious abortion in mares <i>Edwin S. Good and Wallace V. Smith</i> - - - - -	397
Studies on intradermal sensitization, I. Intradermal reactions to emulsions of normal and pathologic skin <i>John H. Stokes</i> - - - - -	402
Studies on intradermal sensitization, II. An intradermal reaction to agar and an interpretation of intradermal reactions <i>John H. Stokes</i> - - - - -	415

NO. 5, MAY, 1916

The bacteria of milk freshly drawn from normal udders <i>Alice C. Evans</i> - - - - -	437
The etiology and experimental production of herpes zoster (Plates 8 to 19) <i>Edward C. Rosenow and Sverre Oftedal</i> - - - - -	477
The epidemiology of pellagra in Nashville, Tennessee <i>James W. Jobling and William Petersen</i> - - - - -	501

NO. 6, JUNE, 1916

Immunologic studies on Hodgkin's disease <i>J. J. Moore</i> - - - - -	569
A study of gas-production by different strains of <i>Bacillus abortivo-equinus</i> <i>Edwin S. Good and Lamert S. Corbett</i> - - - - -	586
A new culture medium for the isolation of <i>Bacillus typhosus</i> from stools (Plate 20) <i>J. E. Holt-Harris and Oscar Teague</i> - - - - -	596
A new differential culture medium for the cholera vibrio (Plate 21) <i>Oscar Teague and W. C. Travis</i> - - - - -	601
Studies in diphtheria in Cleveland <i>R. G. Perkins, M. J. Miller, and H. O. Ruh</i> - - - - -	607
A variation of gemmation of <i>Blastomyces dermatitidis</i> in the tissue lesion (Plates 22 and 23) <i>H. Windsor Wade</i> - - - - -	618
The coexistence of antibody and antigen in the body (Plates 24 and 25) <i>B. S. Denzer</i> - - - - -	631
An improved brilliant-green culture medium for the isolation of typhoid bacilli from stools <i>Oscar Teague and A. W. Clurman</i> - - - - -	647
A method of preserving typhoid stools for delayed examination, and a comparative study of the efficacy of eosin brilliant-green agar, eosin methylene-blue agar, and endo agar for the isolation of typhoid bacilli from stools <i>Oscar Teague and A. W. Clurman</i> - - - - -	653
